

## OFFICIAL STATEMENT

### Important Information Regarding AG&P's People and Operations Following the Taal Volcano Eruption in the Philippines on January 12, 2020

AG&P is pleased to advise that all our employees, site-based clients and contractors in the Philippines are safe and well following the Taal volcano eruption in Batangas province, 64kms south of Manila. Safety is our main priority, so we are taking all necessary steps to protect our people, while ensuring our business operations are maintained.

Our operations in Batangas province, approximately 40kms south of Taal Island, remain operational, including our sites in Bauan, Batangas City and Simlong. Our offices in Muntinlupa, Pasig and Leyte are operating normally.

AG&P is working closely with all relevant Philippine authorities to actively monitor the situation and to fully comply with their advisories.

In keeping with AG&P's policy of assisting communities impacted by natural disasters, we have donated essential goods and established a 'Call for Donations' drive for our employees. If you would like to donate, please contact Crissie Guda: [cristina.guda@agpglobal.com](mailto:cristina.guda@agpglobal.com)

Please join us in our prayers for the affected communities and the emergency services responding to this natural disaster.
